SUMMARY

Academically distinguished Cybersecurity graduate (Graduated with Excellence) and Cisco-certified Cybersecurity Defense Analyst with demonstrated experience in runtime security monitoring, threat hunting, and autonomous mitigation. Skilled at bridging secure software design with defensive architecture and SOC operations, leveraging Splunk (SPL), MITRE ATT&CK, and container security tools. Backed by a solid CCNA and Network Defense foundation, offering a strong combined profile as both a secure software evaluator and cybersecurity defense analyst.

TECHNICAL SKILLS

Cybersecurity & Networking: Penetration Testing, Runtime Security, Container Security (Docker), Open Policy Agent (OPA/Rego), Falco, Digital Forensics, Cryptography, Formal Protocol Verification (AVISPA), Network Routing & Switching
Languages & Frameworks: C#, Java, Python, JavaScript, ASP.NET Core MVC, HTML5, CSS3
Databases & Tools: SQL Server, PostgreSQL, Linux/WSL (Ubuntu)
Methodologies: AI-Augmented Software Prototyping, Prompt Engineering for Developers, Agile Team Leadership

LICENSES & CERTIFICATIONS

CCNA — Cisco Certified Network Associate — Pioneers Academy	Dec 2024
Certified Ethical Hacker (CEH) — Green Circle for Cybersecurity	Sep 2025
JavaScript Essentials · HTML Essentials · CSS Essentials — Cisco Networking Academy	May 2026
Ethical Hacker & Endpoint Security — Cisco Networking Academy	Aug 2026
Cyber Threat Management — Cisco Networking Academy	Aug 2026
Network Defense — Cisco Networking Academy	Aug 2026
Endpoint Security — Cisco Networking Academy	Aug 2026
Junior Cybersecurity Analyst Career Path — Cisco Networking Academy	Aug 2026
Cybersecurity Defense Analyst Career Path — Cisco Networking Academy	Sep 2026

CORE PROJECTS

MRSAD — Monitoring Runtime Sentinel & Autonomous Defense <i>Project Team Leader & Technical Architect · Academic Graduation Project</i> – Led a 5-member team through architecture, sprint coordination, and deployment of a containerized security monitoring platform. – Built a Go-based runtime anomaly detection engine flagging unauthorized shell spawning and anomalous container network activity. – Shipped an AI-assisted Next.js dashboard tracking incident lifecycles (MTTD/MTTR), backed by OPA/Rego policy-as-code evaluation. – Co-engineered automated container quarantine and SHA-256 evidence preservation for forensic-grade log integrity.	Feb 2026 – Jun 2026
ZTSplit — Zero-Trust Split-Key Cloud Storage Protocol <i>Security Research & Protocol Developer · Academic Research Project, Zarqa University</i> – Co-designed a 4-party, zero-trust cloud storage protocol with split-key encryption distributing file layers and decryption keys across independent nodes, eliminating single points of failure. – Formally verified protocol resilience against MitM and replay attacks using the AVISPA tool (OFMC back-end).	Oct 2025 – Jan 2026
CareNet — Smart Health & Donation Hub <i>Secure Software Developer · Course Project, Visual Programming (C#)</i> – Developed a responsive ASP.NET Core MVC health portal with structured telemetry logs, plus “BloodLink,” a real-time blood donation matching system. – Enforced session-based authentication and owner-level data validation to protect patient privacy, with clean MVC separation of concerns.	Mar 2025 – Jun 2025

EDUCATION

Bachelor of Science in Cybersecurity Zarqa University, Faculty of Information Technology — Jordan Graduated with an Excellent rating	Oct 2022 – Jun 2026
